

# Download Mac Laptop Manual Eject

Perhaps one of the quickest ways to eject a CD or DVD is to right-click on its desktop icon and select Eject from the pop-up menu. Some applications, such as iTunes and Disk Utility, have an eject command in a menu or toolbar. Launch the application and use the eject command to eject the CD or DVD. Use the Eject menu applet located in the Mac's menu bar. Restart your Mac while holding down the mouse button. This will usually prompt your Mac to force the CD to eject upon starting back up. If you use a traditional mouse with your Mac, make sure you're holding down the left mouse button. Use Disk Utility to open the CD tray. Hold down your trackpad button (or your left mouse button) and restart your Mac. Hold the button down until the desktop appears. This will trigger the system to eject your disc before OS X begins loading. Shut down the Mac and restart it, then let it sit for 15 minutes. After a short amount of time, the disc may eject itself. Manual Eject Stuck CD/DVD from a Mac (MacBook) In general a CD or DVD can be ejected on a Mac (MacBook) using the physical eject button or from the finder without any problems, but occasionally this don't work and the disc icon might disappear from your Desktop and you can't get the disc out of your computer. However, there is a trick you can try to extract the stuck disc. Restart your Mac.
